PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 6+ years of experience building scalable web applications. Expertise in Vue 3, JavaScript, Playwright, and Azure, with strong experience in automation, web scraping, and performance optimization. Passionate about writing clean, maintainable code and improving system reliability.

SKILLS

Languages: HTML 5, CSS 3, JavaScript

Technologies & Tools: Vue 3, Vue Router, Pinia, Playwright, Git, Github, Azure Basics

WORK EXPERIENCE

Realpage, Hyderabad

15-07-2024 - Present

Developer II

- Engineered a robust scraping solution for the US real estate market, leveraging JavaScript and Playwright to scrape 40,000+ real estate listings daily, ensuring 98% data availability.
- Developed 70+ robust web scraping scripts using Playwright to scrape dynamic and JavaScript-heavy websites.
- Deployed a robust automated workflow via Azure Functions and Time Triggers for automated daily execution, ensuring 100% scheduled reliability.
- Developed a comprehensive Vue 3 web application to visualize scraping KPIs and daily statistics, reducing the mean time to detect (MTTD).
- HTML 5, CSS 3, JavaScript, Vue 3, Vue Router, Pinia, Playwright, Git, Github, Azure

Capgemini, Hyderabad

18-07-2019 - 12-07-2024

Consultant

- Redesigned the Internet Banking (IB) interface using Vue 3, resulting in an increased user satisfaction.
- Optimized application performance and achieved reduction in initial bundle size by implementing advanced Vue 3 code-splitting and lazy-loading strategies, significantly enhancing time-to-interactive for banking customers.
- HTML 5, CSS 3, JavaScript, Vue 3, Vue Router, Pinia, Jest, Testcafe, Git, Github, Azure

EDUCATION

Future Institute of Engineering and Management

Bachelor of Technology in Electronics and Communication

PROJECT WORK

Sasta Swiggy

- Sasta Swiggy is a clone of the popular food delivery service Swiggy, built using React, Express, Firebase and various other technologies.
- Optimized application performance by implementing lazy-loading strategies, significantly reducing the initial bundle size.
- Handled user authentication using Firebase Authentication. User can create account using email/password method or login using Google account.
- Payment Gateway: Integrated Razorpay payment gateway.
- Integrated Google Maps API and reverse geocoding service to get user address details.
- Fully optimized for both desktop and mobile devices, ensuring a seamless experience across all platforms.

CERTIFICATES

- Azure Fundamentals (AZ-900)
- Oracle Certified Associate, Java SE 8 Programmer
- Problem Solving Through Programming In C - NPTEL
